

COMMUNITY PREVENTION INITIATIVE TRAININGS & CONSULTING SERVICES

ONTRACK supports California communities' efforts to reduce alcohol and other drug abuse. We match organizations with professionals qualified to offer expertise in areas including, but not limited to: program development, fundraising/grant writing training, strategic planning and cultural competency/inclusion.

Let's promote the health and wellness of our communities together. Take advantage of our statewide reservoir of information and expertise to achieve your prevention goals. Contact us for an application today!

The Community Prevention Initiative

The Community Prevention Initiative (CPI) is a technical assistance and training project that offers **COST-FREE** consulting services and training for communities and organizations throughout California that are committed to reducing and preventing alcohol and other drug abuse.

Resources, workshops, consulting and trainings are available to:

- ❖ **Community-based organizations or coalitions**
- ❖ **Churches, outreach ministries or faith-based organizations**
- ❖ **Neighborhood groups, associations or nonprofits**
- ❖ **School districts or educators**
- ❖ **Community activists, advocates or organizers**
- ❖ **Local or county public agencies**

Trainings grounded in the Strategic Prevention Framework (SPF) help ensure sustainability, growth and the development of effective programs by focusing on:

Assessment— Profile population needs, resources, and readiness to address needs and gaps.

Capacity—Mobilize and/or build capacity to address needs.

Planning—Develop a Comprehensive Strategic Plan.

Implementation—Implement evidence-based prevention programs and activities.

Evaluation—Monitor, evaluate and sustain successful strategies. Improve or replace strategies that fail.

Cultural competency and sustainability are at the heart of the SPF.
